# A Platform to keep track of your million dollar farm

*design, branding & development*

Our most valuable client since 2021. Their dedication to digitally transform harvesting inspired us to go above and beyond to support them with branding & development solutions.

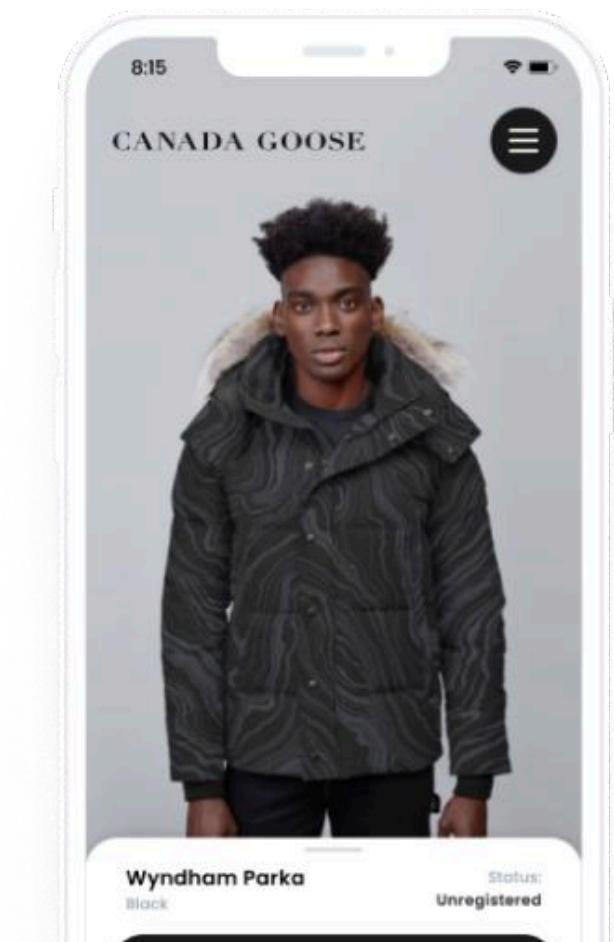

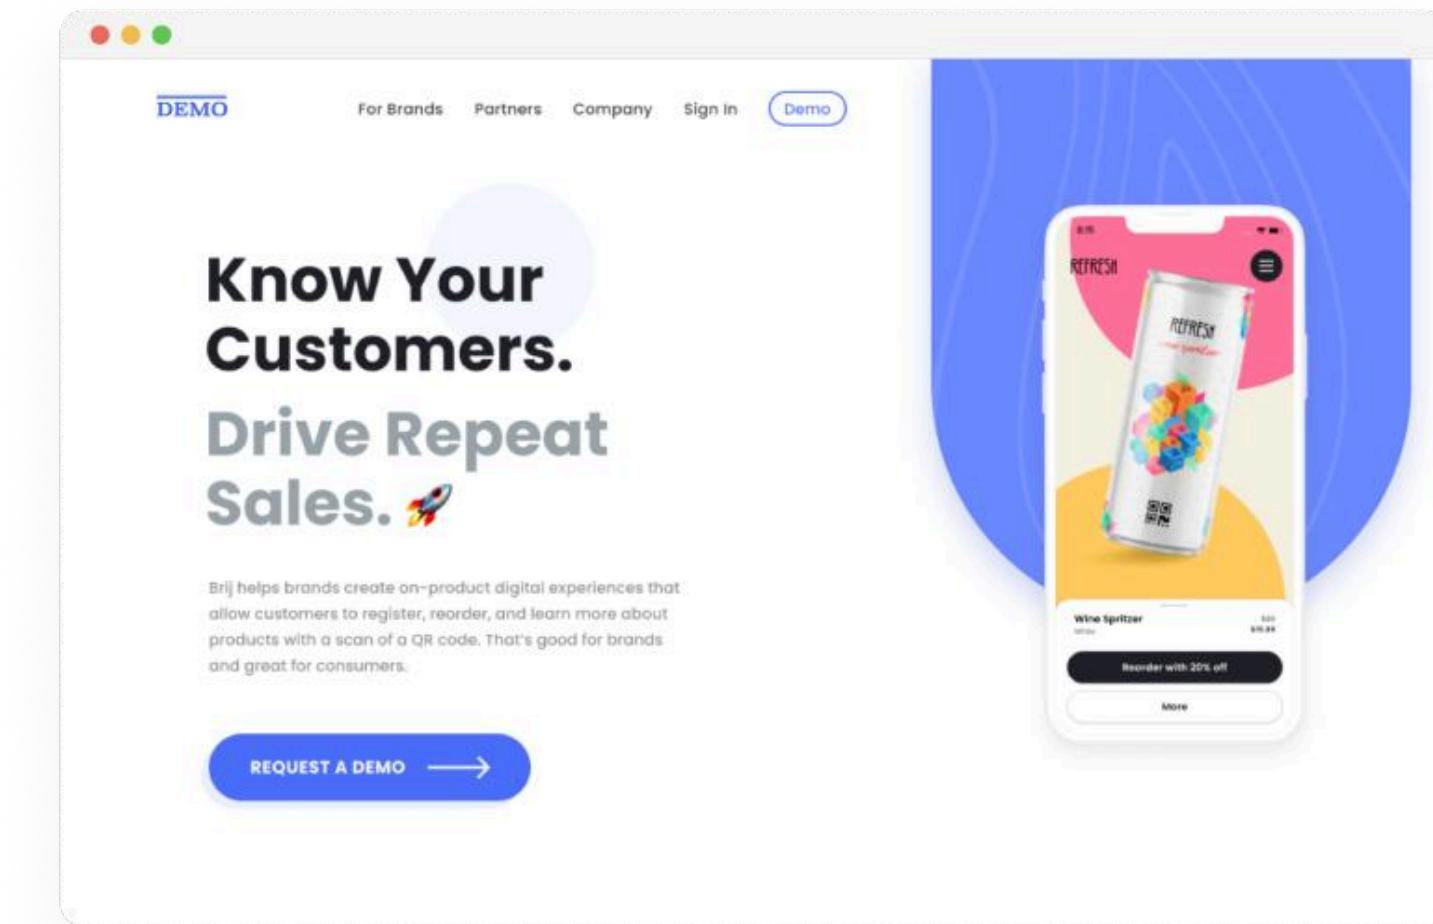

The screenshot displays the ECT VISION platform interface. On the left is a sidebar with the ECT VISION logo at the top, followed by a 'MENU' section with 'Vision Modules' (selected), 'Workers', 'Account Settings', 'Contact Us', and 'GO TO Admin Vision'. Below the menu is a user profile for 'JOEL SMITH' with a 'My Profile &gt;' link. The main content area features a large image of a green tractor in a field. Below the image, the text 'HAY VISION / WEST 40' is displayed, along with 'Hay Type Native Multi-species' and 'Field Size 40 Acres'. A 'ENERGY CURVE ANALYSIS' chart shows a green line with a shaded area representing 'Forecasted GDU' and a dashed line for 'Expected GDU'. A callout box on the chart indicates 'Date 12 Feb. 2022' and 'GDU 982'. To the right of the chart is a map showing a green area labeled 'WEST 40' with a location pin. Below the map is a mobile phone interface showing the 'Smith Farms' dashboard with sections for 'WEST 40 EVENTS', 'HAY VISION' (status: 'Completed on 12 Feb'), 'GARDEN VISION' (status: 'COMING SOON'), and 'CROP VISION' (status: 'COMING SOON'). At the bottom right of the mobile screen is a green circular icon with a white bell symbol. The footer of the main interface states 'Powered by ENERGY CURVE TECHNOLOGY'.

**BRIJ**

# A QR-code activated digital platform

*design & branding*

Decodes has partnered with Brij since late 2020, from creating their first landing page to now supporting Feastables, Heineken, and many others as their direct clients.

# Multiply your joy of Pet Parenting

*design & development*

“Zoop, a Bengaluru-based startup, is a project close to our hearts. They've revolutionized how pet owners track their pets and access services with just a few clicks.

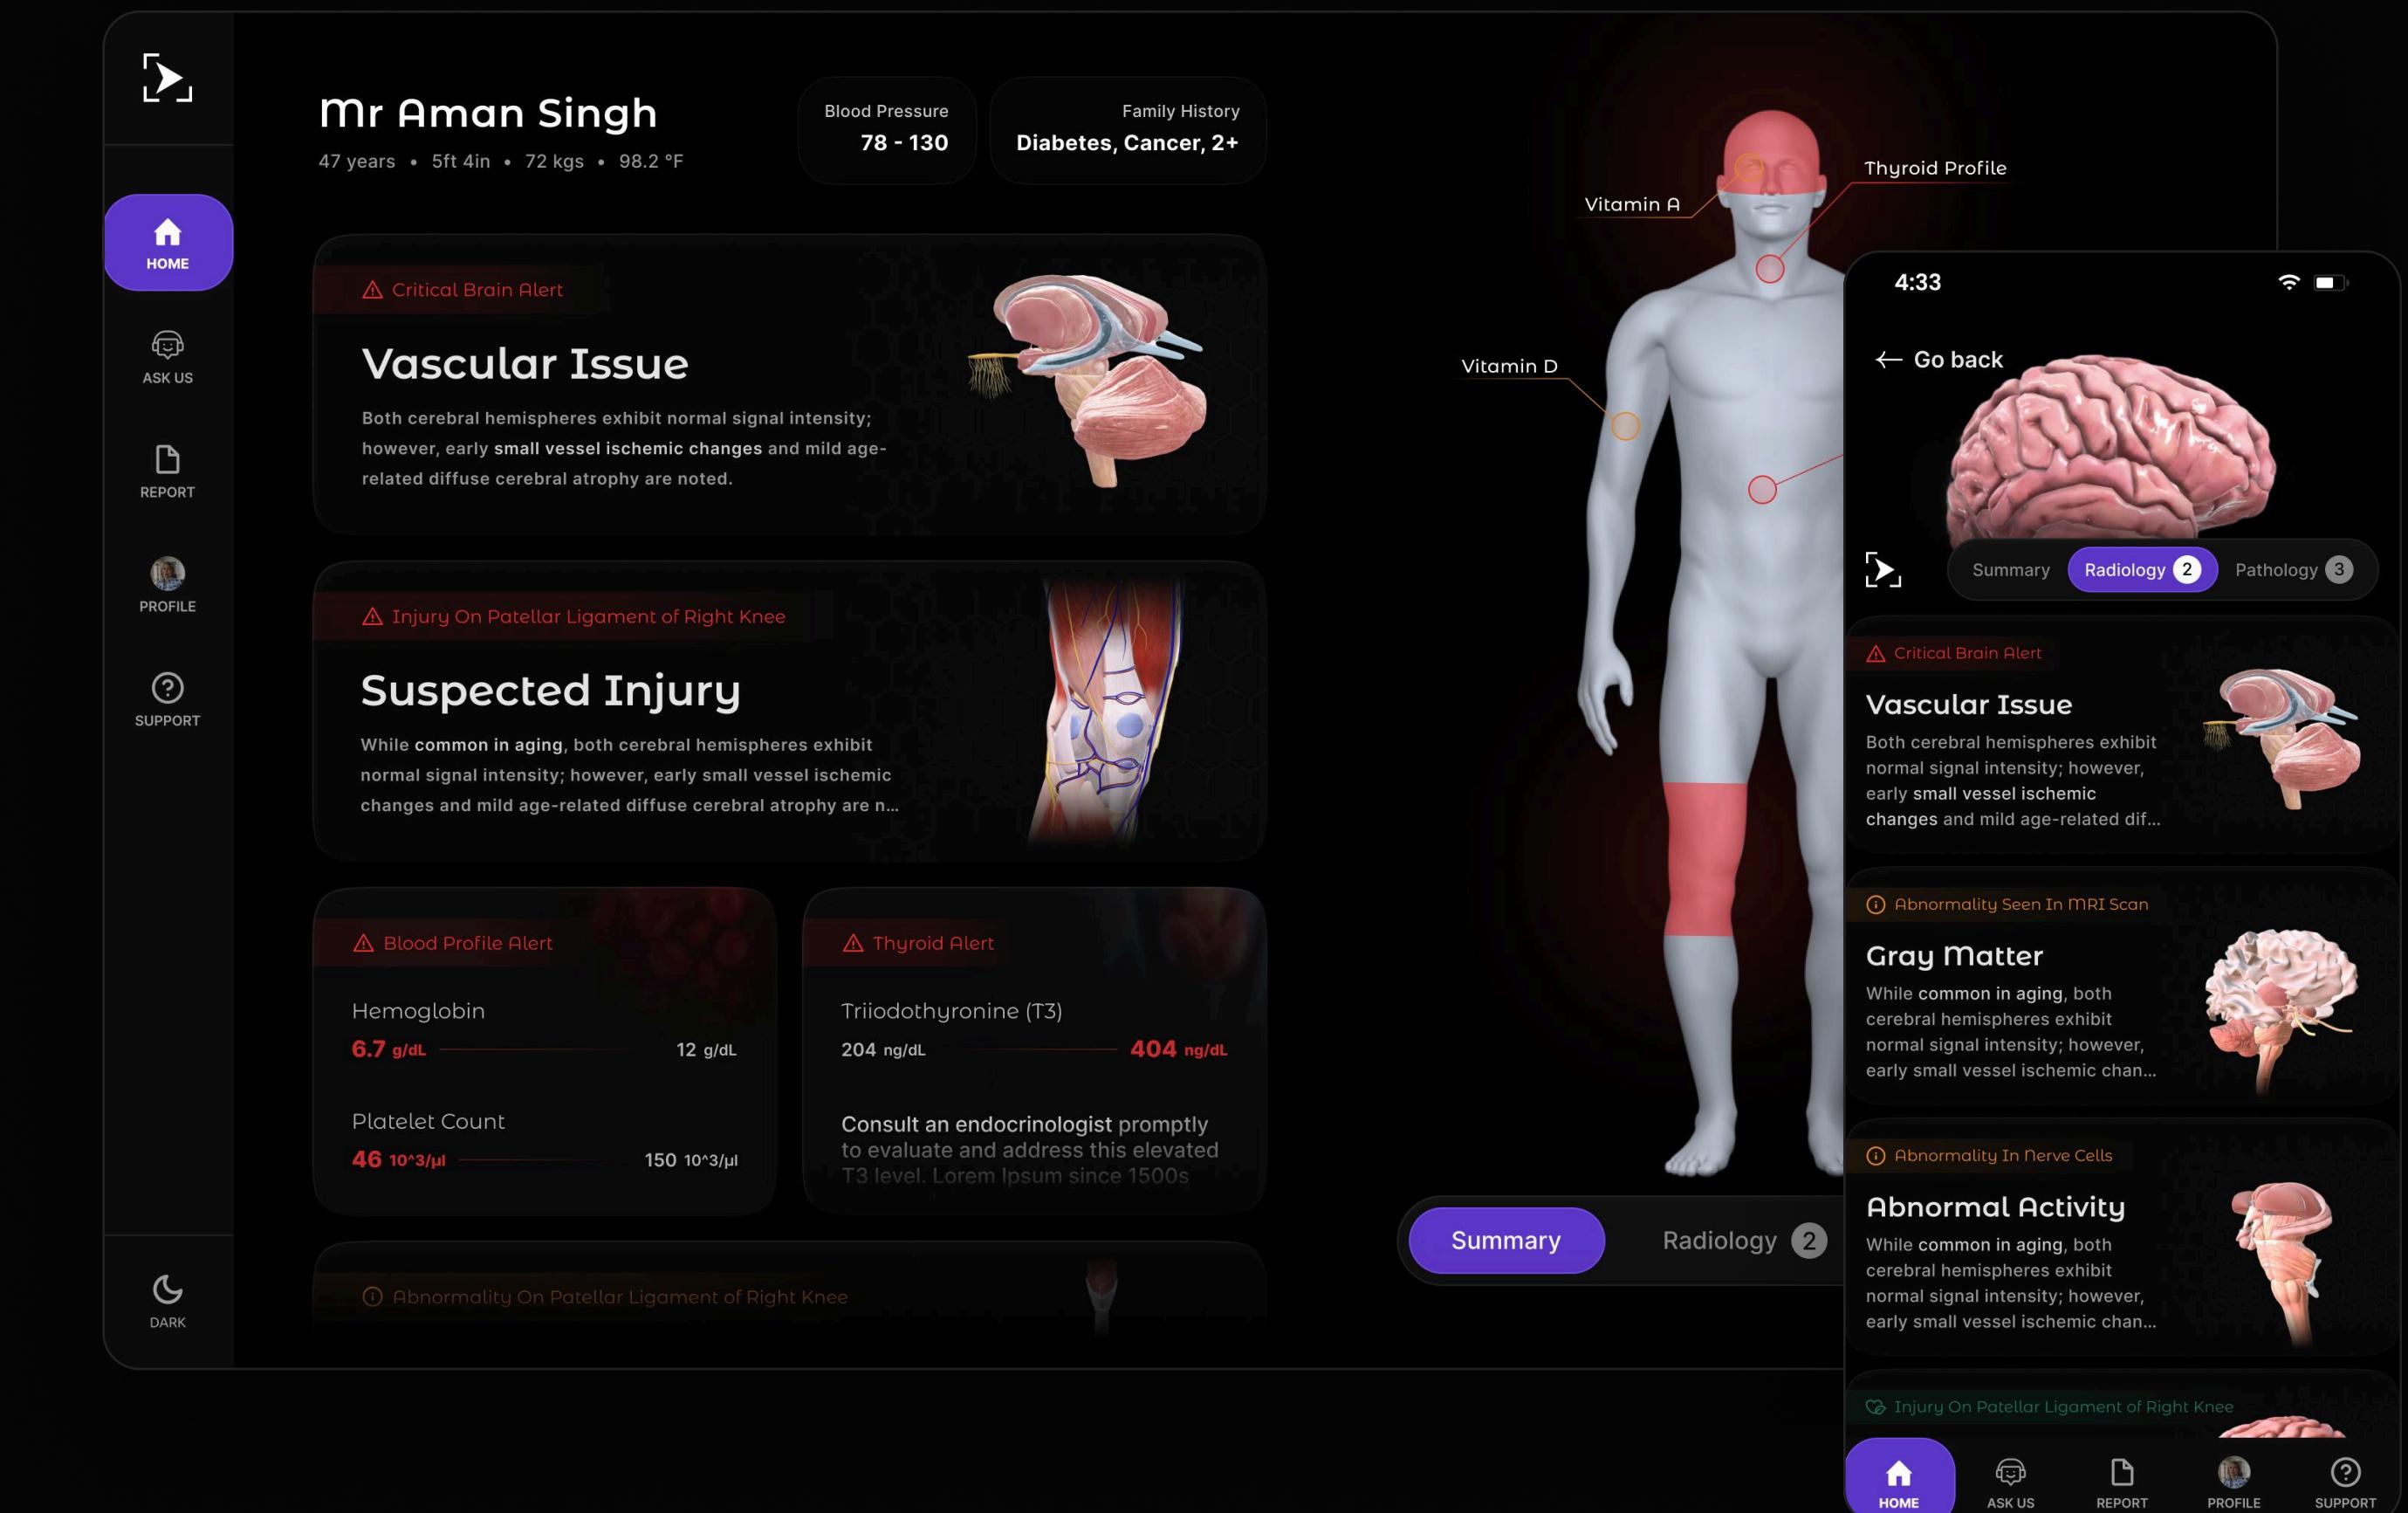

## EVO SCREEN

# Our Most Unique Creation till date

*design & development*

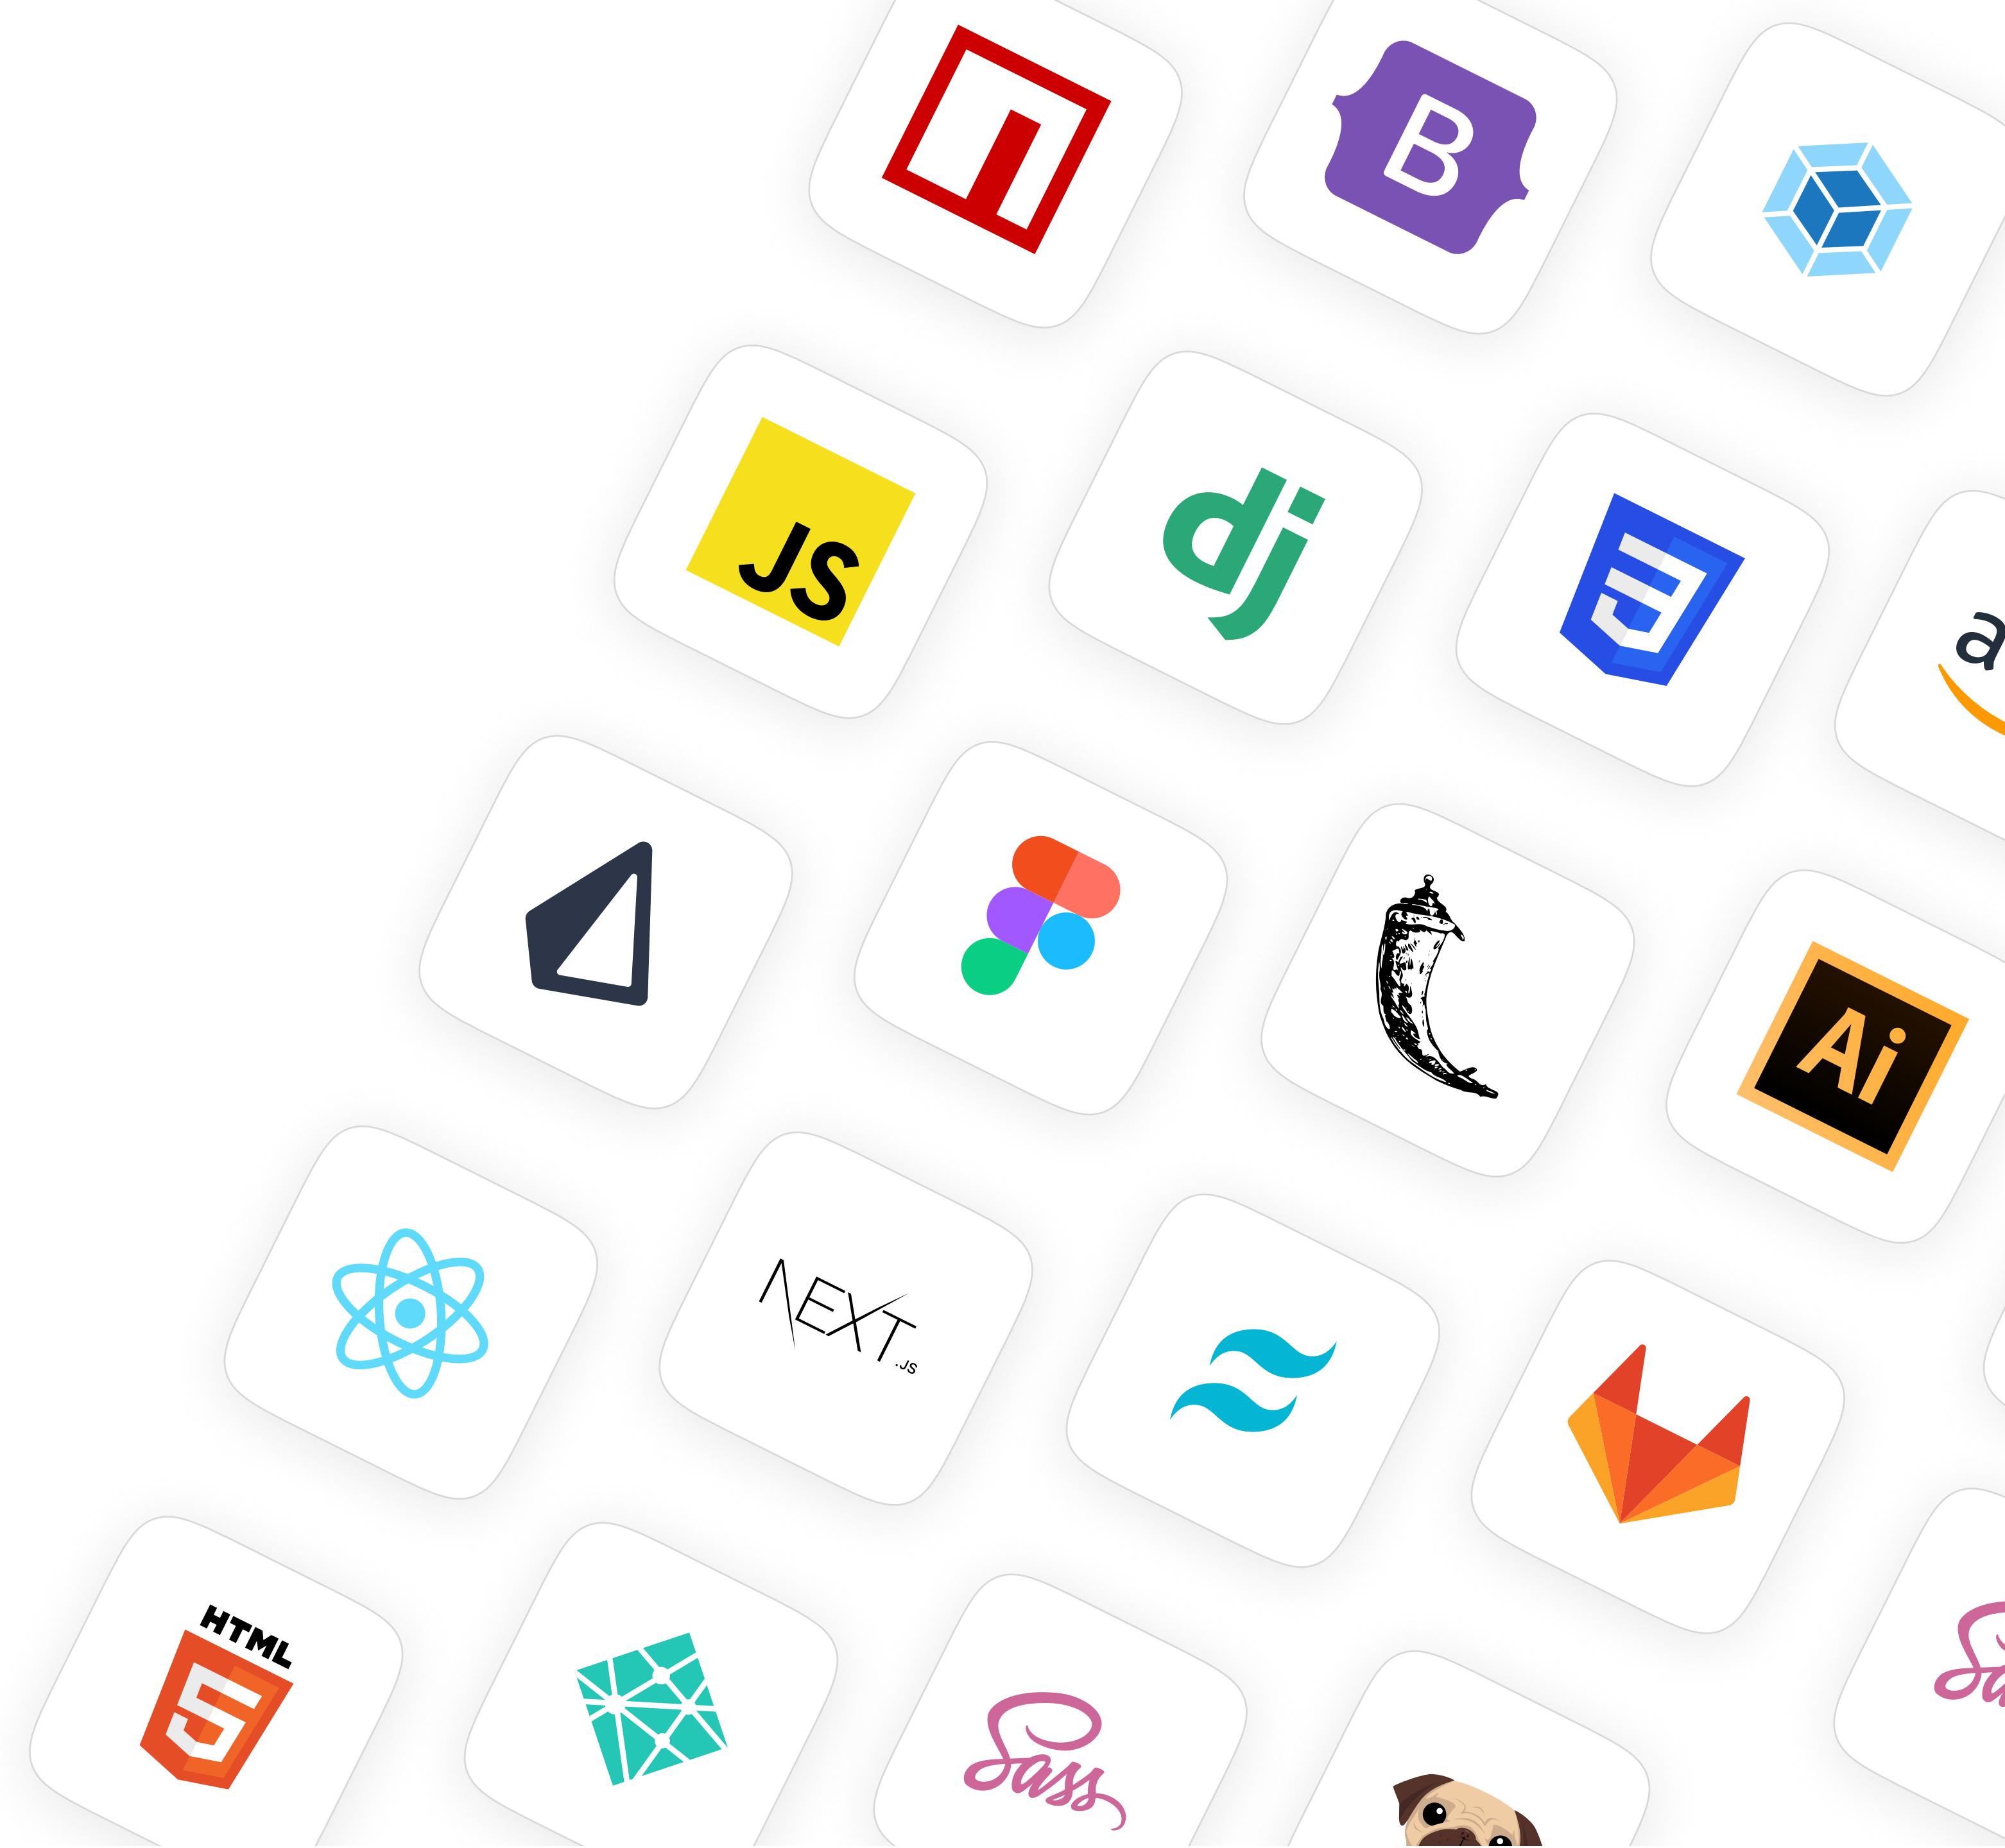

“ 5C Networks was featured in one of Jensen Huang's presentations, reflecting their outstanding work. We brought our best to their new flagship project, Evo Screen.

# Tailored *Technology Stack* for your business

“Our custom tech stack blends modern frameworks and design tools to power scalable solutions for every project.

It's how we deliver exceptional user experiences and drive innovation, all under one roof.

# Let's Build Something *Exceptional*

“Whether you have a rough idea or a full-fledged product in mind, we're here to bring it to life.
